

# A brief introduction to the k-nearest neighbors classifier

**Course:** English for Academic Purposes

**Student:** Eduardo Henrique Basilio de Carvalho

Universidade Federal de Minas Gerais, May 13, 2025

# Table of Contents I

- 1 The classification problem
  - Classifying rodents
  - Labelled data
  - Unlabelled data
- 2 Visual prediction
- 3 Higher dimensional data
  - Limited visualisation
  - Distance
  - Closeness
- 4 Nearest neighbor visualisation
  - Decision boundary
- 5 k-nearest neighbors

## Table of Contents II

- 6 Real data
  - Data summary
  - Results

- 7 Conclusion

# Problem introduction

- Two species
- Count sightings of each
- Take some measurements

# Training data

- Species are distinguishable by fur color
- Measure body length and width with a camera

# Day measurements

Figure: Day sightings plot

# Night measurements

Figure: Night sightings plot

# Data superposition

Figure: Superimposed sightings plot

# Visual prediction

Figure: Visually predicted samples

# Higher dimensional data I

Table: Four-dimensional train samples

Sample	Feature 0	Feature 1	Feature 2	Feature 3	Label
0	-1.12	0.43	-1.5	0.55	1
1	1.93	-1.71	-0.75	-1.15	0
2	1.7	1.63	1.44	-0.42	1
3	-2.45	0.64	-0.48	0.17	1
4	1.14	-0.56	0.46	-1.04	1
5	-1.29	-1.58	-0.04	-2.11	0
6	-1.56	-1.13	-1.08	0.7	0
7	2.02	-0.14	-1.25	-1.96	1
8	1.37	0.01	-3.05	1.66	0

# Higher dimensional data II

Table: Four-dimensional test sample

Feature 0	Feature 1	Feature 2	Feature 3	Label
-0.72	-0.41	1.21	-2.49	?

# Distance

**Table:** Four-dimensional train samples with distances

Sample	Feature 0	Feature 1	Feature 2	Feature 3	Label	Distance
0	-1.12	0.43	-1.5	0.55	1	1.62
1	1.93	-1.71	-0.75	-1.15	0	4.47
2	1.7	1.63	1.44	-0.42	1	5.24
3	-2.45	0.64	-0.48	0.17	1	4.73
4	1.14	-0.56	0.46	-1.04	1	6.04
5	-1.29	-1.58	-0.04	-2.11	0	6.87
6	-1.56	-1.13	-1.08	0.7	0	7.34
7	2.02	-0.14	-1.25	-1.96	1	8.29
8	1.37	0.01	-3.05	1.66	0	8.99

# Closeness ranking

**Table:** Four-dimensional train samples ranked by distances

Sample	Feature 0	Feature 1	Feature 2	Feature 3	Label	Distance	Rank
0	-1.12	0.43	-1.5	0.55	1	1.62	1
1	1.93	-1.71	-0.75	-1.15	0	4.47	2
2	1.7	1.63	1.44	-0.42	1	5.24	4
3	-2.45	0.64	-0.48	0.17	1	4.73	3
4	1.14	-0.56	0.46	-1.04	1	6.04	5
5	-1.29	-1.58	-0.04	-2.11	0	6.87	6
6	-1.56	-1.13	-1.08	0.7	0	7.34	7
7	2.02	-0.14	-1.25	-1.96	1	8.29	8
8	1.37	0.01	-3.05	1.66	0	8.99	9

# Nearest neighbor label

**Table:** Four-dimensional test sample labelled by its nearest neighbor

Feature 0	Feature 1	Feature 2	Feature 3	Label
-0.72	-0.41	1.21	-2.49	1

## 2D set recap

# Edges to the nearest neighbor

# Nearest neighbor prediction

# Decision boundary

# Prediction for 10-NN

# Decision boundary for 10-NN

# Dataset summary

# Results
